Summary

Data Science student with hands-on experience in Python, machine learning, and data analysis. Built end-to-end ML projects including fraud detection and price prediction models.

Skills

Python, SQL, Pandas, NumPy, Scikit-learn, Machine Learning, Data Visualization, Streamlit, Git, Excel

Projects

Credit Card Fraud Detection: Built a classification model using Logistic Regression, Random Forest, and XGBoost on transaction data. Deployed using Streamlit.

House Price Prediction: Used Lasso regression for feature selection and Ridge regression for final model, deployed as a web app.

Education

B.Tech in Computer Science, XYZ University (2022-2026)
